Columbus, OH. 43228-9642

Dear Jim,

Thank you for providing the American Standard Testing Method (ASTM) product test results from your three polypropylene films (#00403, #00434 and # 00456). The test results show that these products meet all Domestic Mail Manual standards for automation postage rates on either the AFSM 100 or AFSM 1000 postal flat sorting equipment. In addition, at the time of mailing, all requirements from Domestic Mail Manual C820 must be met in order to qualify a mailing for automation flat-rate discounts.

Sincerely,

Sue E. Heffner
